Summary

- Full-Stack Developer with 3+ years of professional experience building responsive, user-friendly web applications using React, Vue.js, JavaScript, Tailwind CSS, and Bootstrap.
- Experienced in backend development using ASP.NET Core Web API, C#, Node.js, and SQL Server, with a focus on RESTful APIs, clean code, and maintainable software.

Skills

- **Frontend:** HTML 5 | CSS 3 | Bootstrap | Tailwind CSS | SASS | JavaScript | VueJS | ReactJS | TypeScript | Flowbite | PugJS | GulpJS
- **Backend:** C# | ASP.NET Core | Web API | Entity Framework Core | LINQ | SQL Server | Node.js | Express | PostgreSQL
- **Architecture & Design:** SOLID Principles | Repository Pattern | Onion Architecture | Clean Architecture | Design Patterns
- **Testing:** xUnit | Vitest | Playwright | TDD

Key Projects at Azm Squad

Premium Residency Monitoring System, 08/2026 – Present

Full-Stack Developer | Saudi Premium Residency Monitoring System

- **Monitoring Dashboard:** Developed user interfaces for monitoring residency-related data, compliance status, and operational activities.
- **Compliance Monitoring:** Implemented interfaces to support tracking compliance requirements and identifying cases that require further review.
- **Case Management:** Built user interfaces for managing monitoring cases, reviewing case details, and tracking their statuses throughout the workflow.
- **Approval Workflows:** Developed interfaces supporting review and approval processes in accordance with business rules and operational requirements.
- **Dynamic Data Handling:** Integrated front-end components with backend APIs to retrieve, display, and manage monitoring data efficiently.
- **Responsive UI/UX:** Created intuitive, maintainable, and responsive interfaces to improve usability and ensure a consistent experience across the system.

CategoryProduct (.Net Fullstack) 05/2026 – 07/2026

- Developed a full-stack application using .NET to manage products and categories, implementing CRUD operations, backend business logic, and database integration.

ThePass | AI-Driven Recruitment Platform, 01/2024 – 04/2026

React · TypeScript · Tailwind · TanStack Query

- **AI Video Interviewing:** Developed the front-end interface for an automated AI interviewing system that records and analyzes candidate responses in real-time.
- **Applicant Management System (ATS):** Built a comprehensive dashboard to organize, filter, and track applicants through different hiring stages efficiently.

- **Automated Examination Engine:** Designed and implemented a dynamic testing module that allows recruiters to create, manage, and grade technical and soft-skill exams.
- **Data Export & Reporting:** Integrated advanced data handling features, allowing users to export candidate performance reports and analytics in multiple formats (CSV/Excel/PDF).
- **State Management:** Managed complex application states and data flows to ensure a seamless experience while handling large volumes of candidate data.
- **Dynamic UI/UX:** Created a responsive, user-friendly interface that simplifies the recruitment workflow for both HR managers and candidates.

Work History

Azm Squad, *Full Stack Engineer* 10/2023 – Present

- **Full-Stack Development:** Built responsive web applications using ReactJS, VueJS, and ASP.NET Core Web API.
- **UI Implementation:** Converted Figma designs into clean, maintainable code using Tailwind CSS, Bootstrap, and Sass.
- **Backend Development:** Developed and integrated RESTful APIs using ASP.NET Core, Entity Framework Core, and SQL Server.
- **Performance & Integration:** Optimized application performance and ensured seamless communication between front-end and back-end services.

RF Peaks, *Medical Equipment Maintenance Engineer* 10/2020 – 01/2022

- **Technical Support:** Performed routine and corrective maintenance on specialized medical equipment to ensure 100% operational uptime.
- **Troubleshooting:** Diagnosed hardware and software malfunctions in complex medical systems, providing rapid and effective technical solutions.
- **Compliance & Documentation:** Maintained detailed service logs and technical reports, ensuring all equipment met health and safety regulations.

Military Service, *Engineer-Officer* 04/2018 – 10/2020

- **Leadership & Supervision:** Managed technical teams and oversaw engineering projects, ensuring tasks were completed accurately and under tight deadlines.
- **Operational Planning:** Coordinated engineering resources and logistics in high-pressure environments, emphasizing discipline and precision.

Education

B.Sc. in Communications & Electronics Engineering, 07/2017
Higher Giza Institute of Engineering & Technology

My Projects

Customer Support – CRM, *Full-Stack Developer | ASP.NET Core & React*
5,266 automated tests, 64 user stories
Developed a bilingual (Arabic/English) customer support platform featuring ticket management, automated assignment, SLA monitoring, real-time notifications, AI-powered ticket categorization, multi-channel communication, and reporting dashboards, using ASP.NET Core, React, and SQL Server.

FoodFlow – Food Delivery Management Platform, *Full-Stack Developer | Vue.js, Node.js & PostgreSQL*
Playwright E2E tests caught 9 real bugs that 610 earlier tests had missed.
Developed a full-stack food delivery platform featuring restaurant and menu management, order processing, driver dispatch, and administrative workflows. Implemented secure JWT authentication, REST APIs, modular architecture, database transaction handling, and automated testing using Vue 3, Node.js, Express, and PostgreSQL. Supported Arabic/English localization, RTL layouts, and light/dark themes.

TaskFlow – Todo List Application, *Full-Stack Developer | React & Node.js*
Developed a full-stack task management application featuring user authentication with JWT, task CRUD operations, priority management, filtering and sorting, and a responsive interface with dark mode support. Implemented REST APIs, per-user task isolation, input validation, and automated testing using React, Node.js, Express, and Vite.

Porto, *Responsive bicycle-shop storefront built with HTML, CSS and JavaScript.*

Nola Cakes, *Bakery website with a product showcase, built with HTML, CSS and JavaScript.*

Food-Blog, *Recipes and culinary blog layout, built with HTML and CSS.*

Axit App, *Multi-purpose business template, built with HTML, CSS and JavaScript.*

Leon, *Business portfolio template, built with HTML and CSS.*

Kasper, *Creative agency template, built with HTML, CSS and JavaScript.*

Mini Projects

To Do Login, *To-do app with a simple login screen, built with JavaScript.*

Hangman Game Play, *Classic word-guessing game, built with JavaScript.*

Typing Speed Test, *Measures typing speed and accuracy in real time, built with JavaScript.*

Memory Gameplay, *Card-matching memory game, built with JavaScript.*

Weather App, *Shows live weather for any city using a weather API, built with JavaScript.*

Quiz App, *Multiple-choice quiz with score tracking, built with JavaScript.*

Notes App, *Create, edit and delete notes saved in the browser, built with JavaScript.*
